Bachelor of Computer Science

Chungwoon University 2014 - 2019

About Me

Software Developer with 6+ years of experience in automation and RPA, specialising in C# (.NET). Experienced in developing scalable backend systems and integrations, with hands-on experience in web development using Java and Vue.js. Seeking a Junior .NET Developer role where I can contribute as a .NET-focused developer with full-stack capabilities..

Experience

EDEN TNS Jun 2019 – Dec 2025

Software Developer Jan 2025 – Dec 2025

- Built C#(.NET)-based automation platforms, improving scalability and system perfomance
- Developed MCP components for modular and reusable automation architecture
- Engineered browser automation using Chrome Extension APIs, Native Messaging and IPC
- Improved system stability by enhancing monitoring and resolving bot-level issues
- Contributed to cloud-based RPA solutions using Java and Vue.js (https://wd.digitalworker.co.kr/sign-in)

RPA Developer Jun 2019 – Dec 2024

- Led a team of 5 developers, defining architecture and development standards
- Delivered 100+ automated processes across 10+ projects
- Developed automation process across finance, manufacturing and retail industries
- Built and maintained C#-based RPA bots, improving reliability and performance
